The daily-engagement home screen

LUDUZO

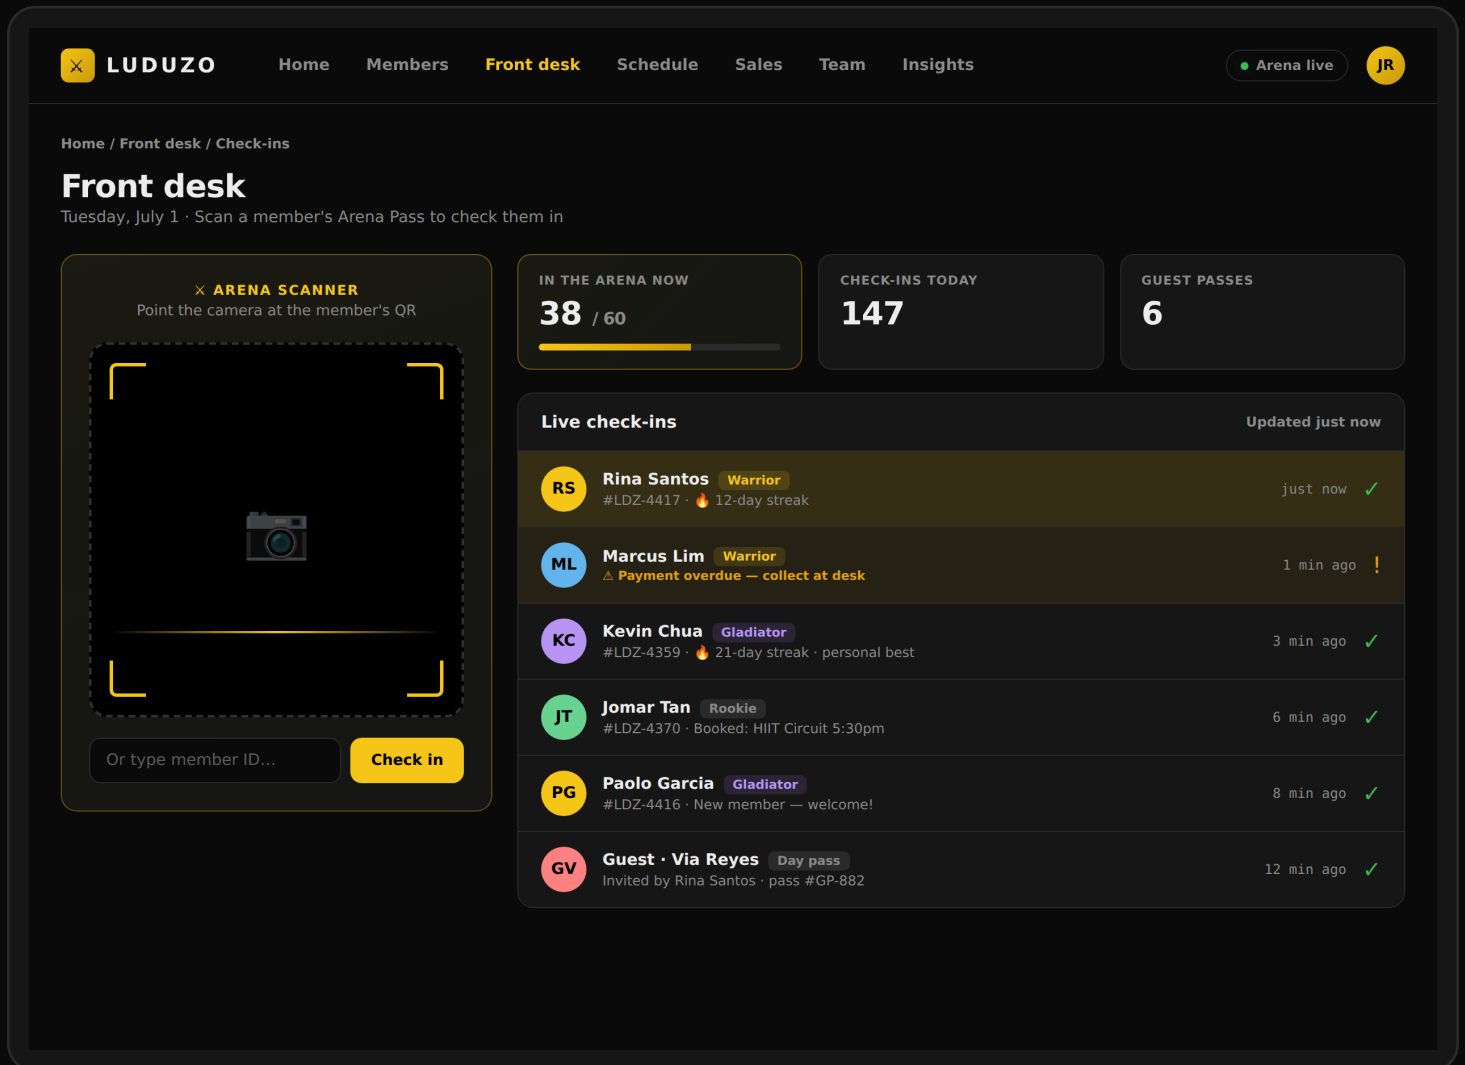

The QR Arena Pass is the hero — check-in is the #1 daily action — with the raised gold tab for one-tap access anywhere. The Tamagotchi pet, streak tracker, and monthly Gladiator Games challenge drive the return-visit loop the product is built around. Phone-native, installable, offline-ready.

03 Front Desk / Check-ins

LUDUZO

Built for speed at the counter

A sticky QR scanner with a manual-ID fallback, a live occupancy meter, and a check-in feed that does real work: overdue-payment members are flagged amber ("collect at desk") the moment they scan in, while streaks, personal bests, new-member welcomes and guest-pass attribution all surface in context.

Status chips (Active / At risk / Overdue / Frozen) let staff triage before scrolling. Colour-coded status dots, plan badges, last-check-in and streak columns make a fading member obvious at a glance. Search, filter, and row-click through to a full profile.
